One Team. One Purpose.

When your goal is beating cancer,
you need a strong team.

One that's united in purpose.

Marshall Health Network has joined our people, our expertise, our technology, and our vast knowledge to form a regional cancer institute, offering:

- More specialists and subspecialists.
- Greater access to breakthrough research and clinical trials.
- Combined resources that are focused solely on helping you beat cancer.

 **Edwards
Cancer Center**

A member of Marshall Health Network

Your team for cancer care.

Message from
Kevin Yingling, RPh, MD, FACP
 Marshall Health Network CEO

We know the people we serve. They are our neighbors, friends, family and colleagues. And they are at the heart of all we do.

For us, 2023 was an exciting year full of growth and change.

Along with Marshall Health and Marshall University, we officially announced Marshall Health Network, an integrated academic health system with the Joan C. Edwards School of Medicine. This move positions us to be the premier health care organization in our region. A place where you can learn, grow and heal in your own community.

Not only do we have a new name, but we also announced new partnerships and new and expanded services. Marshall Health Network includes more than 119 locations across 14 counties in West Virginia, Kentucky and Ohio. With over 1,300 providers, physicians, resident physicians and advanced practitioners, our team has grown to more than 8,300 talented, committed caregivers and support staff.

Our specialty care programs are also growing throughout the system to meet the needs of the communities we serve. We've launched new telehealth services to expand health care access; we're the first in West Virginia to offer new testing for joint infections at Cabell Huntington Hospital; we offer a perioperative clinic at HIMG; and St. Mary's Medical Center has partnered with Cabell County Emergency Medical Services to provide lifesaving blood to patients before they reach the hospital.

We continue our commitment to high quality care and are proud of the tremendous work and dedication of our staff. As a result of their hard work, St. Mary's Medical Center and Cabell Huntington Hospital have once again received numerous national recognitions from leading health care organizations.

We are also incredibly proud to be able to give back and support local organizations and programs that share our commitment to improving the health and well-being of our communities. In the following pages, we will highlight just a small sample of the many organizations we supported throughout the year.

Thank you for choosing Marshall Health Network for your health care needs. We are honored to care for you and your loved ones. Because of us, you're family.

“From primary care and rural health to specialty services, the new system improves access to high quality care for patients of all ages.”

– Kevin W. Yingling, MD
CEO of Marshall Health Network

Introducing Marshall Health Network

Patients deserve the highest quality of care possible. That’s why Mountain Health Network, Marshall Health, Marshall University and the Marshall University Joan C. Edwards School of Medicine have officially formed **Marshall Health Network, Inc.**, an integrated academic health system.

From bruises, to broken legs, to mental health care and cancer, Marshall Health Network is there when you need us most. We are collaborating on better approaches, innovative research, and expanded services to meet the needs of the communities we support.

Our network provides the right care at the right time – in the right place.

What is Marshall Health Network?

MHN is comprised of four hospitals: Cabell Huntington Hospital, St. Mary’s Medical Center, Hoops Family Children’s Hospital and Rivers Health. Plus, the ambulatory facilities, medical offices and employed physician practices of the hospitals, and the Marshall Health physician practice and its facilities.

“From primary care and rural health to specialty services, the new system improves access to high quality care for patients of all ages,” stated Kevin W. Yingling, RPh, MD, FACP, CEO of Marshall Health Network. “Our highly trained physicians and staff are dedicated to addressing our region’s pressing health issues of addiction, behavioral health, obesity, and eldercare. Uniting as a system strengthens our shared commitment to expand research, develop clinical centers of excellence, and offer new medical specialties.”

“This moment brings new meaning to the ‘Power of We,’ unifying our voice and amplifying our academic, clinical and research missions throughout West Virginia and beyond,” said Beth L. Hammers, MBA, CEO of Marshall Health. “Under the Marshall Health Network banner, we look forward to optimizing resources and initiating a holistic shift in how we deliver health care, how we train future health care professionals and how we engage with our communities.”

Marshall University President Brad D. Smith said the formation of the integrated academic health system embodies the history the organizations share and presents a significant opportunity for the future. “Education and research are central to the mission of the new academic health system, and this alignment will strengthen the education’s experience and opportunities for research and discovery for Marshall University students.”

RIVERS HEALTH *Member of Marshall Health Network*

When Pleasant Valley Hospital joined CHH and SMMC as a member of Mountain Health Network in October 2022, the timing was right for a fresh vision and new direction for the future of health care in the region. As a result, PVH adopted the new name Rivers

From training the next generation of health care providers to advancing research and technology, Marshall Health Network is the premier health system and top-tier academic health system for improving the health and wellness of our patients and our communities across the region.

But we're not stopping there.

The need for cancer care in our communities is increasing, so the Edwards Comprehensive Cancer Center (ECCC) and St. Mary's Regional Cancer Center (SMRCC) are coming together to form the **Edwards Cancer Institute**.

Our coordinated and specialized teams using innovative, research-based care will work together to achieve the best patient care outcomes – all right here in our community.

Under the leadership of Chris Hoffman, vice president of oncology, Edwards Cancer Institute is poised to change the trajectory of cancer in our area.

Health.

The new Rivers Health name and branding came after extensive discussions with more than 900 community and staff members and incorporates the key geographic feature of the area, the two rivers that come together at Point Pleasant – the Ohio and Kanawha.

Rivers Health will continue to be the hospital built by the community for the community. As part of Marshall Health Network, RH can provide more services and add more physicians and specialists to expand health care

Get to know the latest leadership announcements for MHN:

Larry D. Dial Jr., MD, has been named chief physician executive for Marshall Health Network and the vice dean for clinical affairs at the Marshall University Joan C. Edwards School of Medicine. Dr. Dial oversees the Marshall Health clinical practices and serves as the liaison between the school of medicine and the physicians of Marshall Health Network.

Melanie Akers, DNP, MBA, RN, NEA-BC, has been named vice president of women's and children's services for Marshall Health Network. Akers provides leadership, direction and administration for the management of Hoops Family Children's Hospital and the women's and children's service lines across Marshall Health Network.

Chris Hoffman, vice president of oncology services, will lead the unified cancer services for MHN.

Chadwick Smith, MD, has been named chief population health officer for Marshall Health Network. Dr. Smith leads the development and implementation of programs and initiatives to improve the health and wellness of the population Marshall Health Network serves.

Nina Wallace has been named manager of diversity, equity and inclusion. In her new role, Wallace manages and coordinates the implementation of programs supporting diversity, cultural competence, inclusion and equity.

Patty Dickey, RN, has been named as community liaison. In her new role, Dickey coordinates the community health activities of MHN, including health fairs, speaking engagements and community health screenings.

Drew Holtzapfel, RN, has been named the director of patient experience for MHN. Holtzapfel provides oversight and strategic leadership to enhance the patient experience across the system.

Improving Patient Services and Benefits

At Marshall Health Network, we are dedicated to our mission of caring for the people we serve. We are committed to creating innovative programs and services, boosting outreach to provide vital wellness services and education, and strengthening current health care services available to our surrounding region. Your well-being is our priority.

Tele-NOW Care available to community

MHN is pleased to offer Tele-NOW Care urgent care services. These virtual provider visits with an MHN provider are for minor illnesses that may not require a face-to-face examination (such as allergies, cough, diarrhea, nasal congestion, pink eye, respiratory infections and yeast infections). A virtual appointment can be scheduled by calling the Telehealth Call Center, 8 a.m. to 8 p.m., seven days a week, at 304.781.8353 (304.781.TELE).

Expanding and enhancing health care in southern WV

Child and adolescent behavioral telehealth services are now available at Summers County ARH Rural Health Clinic, thanks to a new collaboration between Appalachian Regional Healthcare and Marshall Health Network. Through this new relationship, experienced providers from MHN offer mental health support for pediatric patients with diagnoses including depression, anxiety and ADHD.

Marshall Health Network, Marshall Health and Logan Regional Medical Center (LMRC), a ScionHealth Community Hospital, announced a new collaboration aimed at bringing more opportunities for specialty care to southern West Virginia. Organizations will work to identify and implement opportunities to enhance health care services for the residents of Logan and surrounding areas. The team is also looking for new ways to make maternal fetal medicine, neuroscience, telehealth services and other needed services available to support the patient populations served by Logan.

The Marshall University Joan C. Edwards School of Medicine and Marshall Health have also partnered with LMRC, among others, to launch the nation's first separately accredited rural general surgery program. The new five-year program welcomed its first trainees in July 2023. Several Marshall Health specialties, including general surgery and cardiology, have practiced in the Logan area for years.

New medical office building to enhance patient access coming to CHH

Construction of a new medical office building (MOB) on the CHH campus began back in August 2021. When complete, the new facility will house multiple services including physical therapy, neurology services, physician offices, endoscopy, lab and imaging services.

Neurology will occupy the building by the end of February 2024, followed by pulmonary and physical therapy by mid-March 2024.

“From its inception this facility’s intent and design have been to enhance patient access to the most frequently used outpatient services at Cabell Huntington Hospital,” said Tim Martin, chief operating officer of CHH. “It will feature a convenient drop-off area that opens into a welcoming lobby with floor to ceiling windows.”

The new structure will be five floors in total, with ~75,000 square feet of space with two access walkways – one from the parking garage and one to Marshall Health at the main hospital. Patients and visitors who park in the campus parking garage will not need to step outside in the elements for their appointments.

Rivers Health and Mason County EMS

Rivers Health signed an agreement with Mason County EMS and the Mason County Commission to include a dedicated ambulance to provide patient transport needs between medical facilities. This initiative helps improve patient access in Mason County and surrounding areas to high-quality health care.

Improving outcomes for prehospital trauma patients

St. Mary’s Medical Center (SMMC) and Cabell County Emergency Medical Services (CCEMS) have partnered together for a prehospital ground transport blood administration program. The program is the first in West Virginia and serves as a model for other services across the state.

Studies across the country have shown that prehospital blood administration has significantly improved outcomes for patients with hemorrhagic shock. CCEMS supervisors are automatically dispatched to calls that may require blood transfusions and will now carry whole blood or packed red blood cells for use in trauma patients in prehospital settings.

CyberKnife[®]

Enhancing Partnerships and Technology

Hospitals are about more than buildings, equipment and beds. It's about bringing the future of health care to our communities today through technology, innovation and partnerships. At Marshall Health Network, we strive to improve technology, enhance research, and provide an even higher standard of patient care.

SMMC offers the latest generation CyberKnife System for cancer treatment

St. Mary's Regional Cancer Center (SMMC) is now treating patients with the new CyberKnife® S7™ System, a fully robotic device that uses high doses of radiation to kill cancer cells and shrink tumors throughout the body. SMMC is the only facility in the Tri-State area and West Virginia with CyberKnife, which has been available at SMMC since 2007.

The CyberKnife S7 system uses artificial intelligence (AI)-driven technology to track, detect and adapt for any tumor or patient movement in real time throughout the cancer treatment delivery. A non-surgical, non-invasive treatment, CyberKnife can treat tumors and lesions in the head, neck, spine, lung, pancreas, liver, kidney, pelvis, prostate and other areas as appropriate. Treatment is administered during an outpatient procedure in typically five or fewer sessions, compared to forty treatments in traditional radiation therapy.

SMMC is the only facility in the Tri-State area and West Virginia with CyberKnife, which has been available at SMMC since 2007.

CHH offering proven treatment for patients with chronic low back pain

Cabell Huntington Hospital is among the first in the Tri-State to offer an innovative approach to provide relief for patients suffering from chronic low back pain (CLBP), specifically called vertebrogenic pain.

The Intracept® Procedure is a minimally invasive, outpatient procedure which targets the basivertebral nerve (BVN). During the procedure, a specialized probe is advanced into the vertebrae and uses radiofrequency energy to heat the BVN, rendering it unable to transmit pain signals to the brain. The procedure generally takes an hour to perform and is implant free, preserving the overall structure of the spine.

Ghassan T. Moufarrege, MD, a board-certified anesthesiologist and pain management specialist at CHH Pain Management Clinic, is among the first in the area to offer this Intracept Procedure.

Clinical studies of the Intracept Procedure have shown long-term improvements in pain and function sustained for more than five years.

New CORI Surgical System at CHH for knee and hip replacement

The orthopaedic team at Marshall Health and CHH now offers the latest Smith+Nephew CORI Surgical System for knee and hip replacement.

The CORI Surgical System is designed to offer broader capabilities and expand our range of robotic-assisted replacement for those seeking total knee and partial knee replacement, as well as revision knee surgery. The CORI Surgical System has specific software that enables surgeons to 'map out' the knee area during surgery instead of using a CT scan. After the mapping process, surgeons have an accurate model of the patient's knee that allows the surgery to be fully customized to the patient.

CHH first in WV to offer joint infections testing

CHH Laboratory is the first in the state to offer a new panel of testing for joint infections. The BIOFIRE® Joint Infection (JI) Panel is the newest panel intended to aid in the diagnosis of these infections.

The BIOFIRE® JI Panel allows health care providers to quickly identify pathogens commonly found in patients presenting with suspected joint infections, which will optimally guide antibiotic therapy, all in one simple rapid test. Through fast and accurate results, the BIOFIRE® JI Panel may provide more informed decision-making for pathogen-guided management of patients with joint infections. It can also help guide surgical and antibiotic decision-making, thus aiding in antimicrobial stewardship.

HIMG takes the stress out of navigating the surgical process

When a patient is scheduled for surgery, there are a number of tasks that need to be completed, such as lab work, X-rays and other testing. HIMG is taking the stress and confusion out of navigating the surgical process with their Perioperative Clinic. At this clinic, patients can have their pre-surgery visit as well as any required testing done all under one roof. The clinic also obtains any outside information and recommendations needed from other specialists.

HFCH has dedicated space for pediatric emergency patients

Hoops Family Children's Hospital at CHH now has a dedicated lobby space and seven new treatment rooms for pediatric emergency patients. The pediatric emergency room lobby is a newly renovated space designed to match the rest of the children's hospital complete with colorful seating and an interactive gaming system called BEAM™, an award-winning installation that turns any physical space to an immersive and active environment for children older than age two.

MHN Balance Center helps patients with dizziness and balance/mobility

The Marshall Health Network Balance Center was created when the balance centers at Cabell Huntington Hospital and St. Mary's Medical Center were combined. The new location offers patients the latest equipment in a larger space, easier access and parking and more therapists with specialized training in balance issues.

The MHN Balance Center uses the latest tools and techniques to identify the cause of a patient's dizziness or instability. One of those tools is the Bertec Balance Advantage™ System, a cutting-edge immersive virtual reality system that tests the strength of a patient's balance systems. The Bertec simulates real-life activities and then presents balance challenges during those activities. In addition to assessment, the system can also be used for treatment.

Congressional leaders announce funding for kidney care expansion

Cabell Huntington Hospital has provided dialysis to our community since 1962 and was the first hospital in West Virginia to offer dialysis services. Thanks to additional funding, the hospital will continue to lead the way for kidney care by constructing an added 10,000 sq. ft. of clinical space to expand the JCESOM nephrology fellowship program, as well as expand the in-home dialysis program. The new clinical space, located at the Fresenius Kidney Care J. Robert Pritchard Dialysis Center on the CHH campus, will treat an additional 36K patients per year.

“As we build a strategy for innovative health care and life science products coming from Marshall Health Network, our health professionals can feel confident that they have an entire system of people to support their innovative ideas for the improvement of patient care.”

– Kevin W. Yingling, MD
CEO of Marshall Health Network

Promises made. Promises kept at Rivers Health

Remarkable things are happening at Rivers Health. We are committed to expanding services to provide more for the people of Mason and Jackson counties in West Virginia and Gallia and Meigs counties in Ohio. As part of that promise, RH is improving health care through additional services and physician specialists and the revitalization of specific areas.

Marshall Health offers convenient gastroenterology care for patients at Rivers Health. The new service brings dedicated care for a wide spectrum of gastroenterological (GI) conditions including irritable bowel syndrome, pancreatitis, ulcerative colitis, gallstones, Crohn’s disease and celiac disease. Providers see patients both in the hospital and the outpatient clinic.

The Sleep Disorders Center at Rivers Health offers both lab and in-home sleep studies to help you and your doctor learn more about your sleep problems. Anyone experiencing symptoms such as snoring, stopping breathing while asleep, narcolepsy, insomnia or restless leg syndrome should ask their physician for a referral to the Sleep Disorders Center.

Rivers Health also opened a new Family Medicine and Diabetes Care practice in Gallipolis, Ohio. The facility offers chronic disease management for patients with diabetes, as well as primary care provided by Gallipolis native Andrea Roberts, MSN, APRN, FNP-BC.

Turning ideas into solutions with Intermed Labs

Marshall University and Marshall Health Network are partnering with Intermed Labs to move health care and life science ideas into practice to improve patient care.

“As we build a strategy for innovative health care and life science products coming from Marshall Health Network, our health professionals can feel confident that they have an entire system of people to support their innovative ideas for the improvement of patient care,” said Kevin Yingling, RPh, MD, CEO of Marshall Health Network.

Intermed Labs is an award-winning medtech startup studio focused on driving innovation in health care with a commitment to improving patient outcomes. Intermed Labs help clinicians and researchers turn their ideas into transformative, real-world solutions.

Focusing on Quality and Excellence

Marshall Health Network is committed to providing the highest quality patient care to everyone. We take pride in our people and the services they provide. And we strive to be a source of pride for the communities we serve. But don't just take our word on it. Our hospitals have been nationally recognized for that commitment with numerous awards and recognition.

Cabell Huntington Hospital (CHH) is one of **America's 100 Best Hospitals** for 2023. According to new research released by Healthgrades, this achievement puts CHH in the top 2% of hospitals nationwide for overall clinical performance across the most common conditions and procedures. CHH is the only hospital in West Virginia to be named, and this is the fifth consecutive year the hospital has been among America's 250 Best Hospitals (2019-2023).

St. Mary's Medical Center (SMMC) and Cabell Huntington Hospital (CHH) have been recognized in the annual **U.S. News & World Report Best Hospitals** rankings and ratings for 2023-24. The rankings and ratings assist patients and their doctors in choosing the right hospital for them.

SMMC has been recognized among the elite 12% evaluated that earned a **U.S. News Best Hospitals** ranking. Hospitals awarded a "Best" designation excelled at factors, such as clinical outcomes, level of nursing care and patient experience. This is the sixth consecutive year SMMC has been recognized as a Best Hospital.

SMMC has been recognized as a **High Performing Hospital by U.S. News** for back surgery (spinal fusion), COPD, colon cancer surgery, heart attack, heart bypass surgery, heart failure, hip replacement, pneumonia and stroke. CHH has been recognized as a High Performing Hospital for COPD, knee replacement and stroke.

SMMC has also been recognized in the **U.S. News Best Nursing Homes** ratings for 2024. SMMC's Skilled Nursing Unit (SNU) earned the highest possible rating of High Performing for short-term rehabilitation and received a Best Nursing Home designation. This is the second consecutive year the SMMC SNU has been recognized as High Performing.

SMMC has received the American College of Cardiology's NCDR **Chest Pain – MI Registry Platinum Performance Achievement Award** for 2023. SMMC is one of only 262 hospitals nationwide to receive the honor. This is the seventh consecutive year SMMC has received this recognition.

St. Mary's Regional Heart Institute earned a distinguished **three-star rating** from The Society of Thoracic Surgeons (STC) for patient care and outcomes in isolated coronary artery bypass grafting procedures. The three-star rating denotes the highest category of quality, placing SMMC among the elite for heart bypass surgery in the US and Canada.

SMMC has received the American College of Cardiology's NCDR **Chest Pain – MI Registry Platinum Performance Achievement Award** for 2023. SMMC is one of only 262 hospitals nationwide to receive the honor. This is the seventh consecutive year SMMC has received this recognition.

Heart Association Recognizes MHN for Excellence in Heart and Stroke Care

SMMC and CHH have again received several American Heart Association Achievement Awards in recognition of providing high-quality stroke and heart failure care.

SMMC, home of the MHN Cardiovascular Center of Excellence, received the following American Heart Association quality achievement awards:

Stroke Care

Gold Plus Get With the Guidelines® – Stroke (13th consecutive year)

Target: Stroke Honor Roll Elite Plus

Target: Type 2 Diabetes Honor Roll

Heart Failure Care

Gold Plus Get With the Guidelines® – Heart Failure (10th consecutive year)

Target: Heart Failure Honor Roll

Target: Type 2 Diabetes Honor Roll

Cardiac Arrest Care

Gold Get With the Guidelines – Resuscitation Award (10th consecutive year)

CHH received the following American Heart Association quality achievement awards:

Stroke Care

Gold Plus Get With the Guidelines® – Stroke (10th consecutive year)

Target: Stroke Honor Roll

Target: Type 2 Diabetes Honor Roll

MHN hospitals receive Donate Life Awards for organ donation efforts

CHH and SMMC have been recognized by Donate Life West Virginia for their commitment to educate employees and the community about the crucial need for organ, eye and tissue donation. CHH received the Platinum Award, while SMMC received the Titanium Award.

Donate Life West Virginia partnered with CORE and the West Virginia Hospital Association (WVHA) to honor those hospitals and health systems throughout the state who have gone above and beyond to build a culture of donation within their facilities.

MHN Wound Centers receive dual recognitions

The Center for Wound Healing at CHH and the SMMC Wound and Hyperbaric Center have both been honored as dual recipients of the Clinical Distinction and Patient Satisfaction Awards from RestorixHealth, a leading wound care management company. Recipients of these awards meet or exceed national quality benchmarks over a set period.

RestorixHealth's Clinical Distinction Award recognizes those centers that have demonstrated success by meeting or exceeding healing benchmarks, while the Patient Satisfaction Award recognizes those centers that have met or achieved a patient satisfaction score of 96% or higher.

Reaching out to our Community

Marshall Health Network has a rich history of caring for the communities we serve. After all, we live and work here too. We are always looking for new ways to better support our communities through health and wellness education and various outreach programs. Learn more by visiting www.marshallhealthnetwork.org/community.

St. Mary's Centennial Celebration

We are honoring SMMC's historic 100 years of service in a year-long celebration. The Pallottine Missionary Sisters opened St. Mary's Hospital with 35 beds on Nov. 6, 1924. Today, SMMC is the largest medical facility in Huntington, one of Cabell County's largest private employers and, at 393

beds, is among the largest health care facilities in West Virginia. For more information about the St. Mary's Centennial Celebration, visit www.st-marys.org/centennial.

Huntington Christmas Parade of Lights

MHN helped spread some cheer and light up the streets of downtown Huntington during the annual Christmas parade in December 2023.

Big Brothers Big Sisters of the Tri-State

Since 2014, SMMC Surgery staff members, along with North Star Anesthesia, have sponsored 30-60 children in the Big Brothers Big Sisters program for Christmas. This year, the department sponsored 28 children, as well as raised \$2,860 for two families. Marshall Health Network is also a proud sponsor of the Bowl for Kids' Sake fundraiser for the organization.

United Way of the River Cities

Each year Marshall Health Network employees are encouraged to donate to the United Way of the River Cities to help give back to our communities. Through these efforts, we helped raise over \$83K in 2022.

Huntington City Mission

The Huntington City Mission provides more than 2,000 hot meals each week to men, women and children in the Huntington area. Marshall Health Network was proud to sponsor their box lunch program in 2023.

Huntington Chilifest

Marshall Health Network took home the People's Choice Award at Chilifest, which benefits the Ronald McDonald House of Huntington located on 17th Street behind Cabell Huntington Hospital. RMH offers families a home away from home, 24 hours per day, 7 days per week, 365 days per year, completely free of charge.

Golden Girl Group Home Equine Riding Program

Marshall Health Network donated funds to assist with a new equine therapy riding program for Golden Girls Group Home. This new program is another resource to assist the nonprofit group helping young girls aged 12-18, located in Ceredo, WV.

Heritage Farm

Marshall Health Network presented Heritage Farm with a \$10,000 donation to aid in the development of a new exhibit, "A History of Heritage," at their Smithsonian affiliated facility. The exhibit will highlight the story of the rural farm in Wayne County, West Virginia, as well as serve as a reminder to future generations about the importance of their own heritage.

Reaching out to our Community

Huntington's Kitchen

Huntington's Kitchen, the outreach community food center of Cabell Huntington Hospital (CHH) and home of Marshall University's Department of Dietetics, is a place where people can learn, cook and experience everything that well-prepared food and healthy living have to offer.

Diversity Committee Initiatives

Marshall Health Network, under the direction of Nina Wallace, is committed to workforce diversity by fostering and advancing a culture of equity and inclusion. We are also dedicated to supporting the health of our community regardless of age, race, gender, sex, color or creed. The Diversity Committees at all three hospitals have been highly active in offering health screenings, attending health fairs and holding hiring events in our minority communities. St. Mary's School of Nursing, in partnership with Mountwest Community and Technical College, offers a scholarship to a minority/person of color each year.

SMMC Foundation Gala

The annual St. Mary's Medical Center Foundation Gala in May offered an evening of fun, food and entertainment at the Marshall University Recreation Center. The 2023 gala, "Enchanted Evening," benefitted the St. Mary's School of Nursing.

Kids' Fest

Kids' Fest is a multi-day, community-wide festival that offers family-friendly events across the Huntington area. Marshall Health Network donated to the event to help benefit the Huntington Children's Museum, a child-centered place that promotes exploration and a love for learning through play.

River Cities Ministry

MHN is proud to help support this faith-based nonprofit group dedicated to meeting basic human needs and providing community support and a sense of belonging.

Marshall Artist Series

Since 1936, the Marshall Artists Series has served as the cultural center for Marshall University students and the surrounding communities, cultivating a greater understanding and appreciation of professional performing arts through a variety of programs. MHN helps support this initiative held at the historic Keith Albee Theatre.

ASPIRE

Grow your career with Marshall Health Network

Healthcare professions are incredibly rewarding and in-demand careers. But the cost of higher education can often be an obstacle for students wishing to pursue jobs in the healthcare field. To help more students have the opportunity to fulfill their career dreams, Marshall Health Network (MHN) is launching a tuition assistance award program to help students pay for nursing, respiratory care, laboratory technology, surgical technologist, or medical imaging programs.

Current roles and training opportunities through ASPIRE:

LPNs

- Collins Career Technical Center (CCTC)
- Ashland Technical and Community College (ACTC)

Lab Technologist

- Shawnee State University
- Marshall University
- BridgeValley CTC

Radiology Technologist

- St. Mary's School of Medical Imaging
- CCTC

Respiratory Therapist

- St. Mary's School of Respiratory Care

Surgical Technologist

- On-campus classes (CHH) in partnership with MCTC

Losing your balance?

Changes in stability can lead to falls and serious injury.

Safely, try this basic balance test.

Near a stable surface, such as a countertop, or with someone standing nearby to prevent falling:

- Stand like you're on a balance beam, with one foot in front of the other so your heel touches the opposite toes.
- Hold this position for 60 seconds, standing as still as possible.

- If you move your feet, reach out for the surface/person, or catch your balance, talk to your primary care provider about a referral to the [Marshall Health Network Balance Center](#) for a balance evaluation.

With more than 30 years of experience, the Marshall Health Network Balance Center team uses unique tools and techniques to help you stay safer in your home and daily activities.
